How Safety Radar works

COLLECT • ANALYZE • COMMUNICATE

FRONTLINE CAPTURE

Safety Center

Mobile-friendly reporting built for the field. Capture incidents, hazards, or near misses in seconds, anytime, anywhere.

LIVE OPERATING PICTURE

Live Risk Dashboard

Track rising hazards, pinpoint root causes, and monitor exposure by site, region, or timeline. Built for action, not shelf reports.

TRAINED ON YOUR RISK

Safety Intelligence

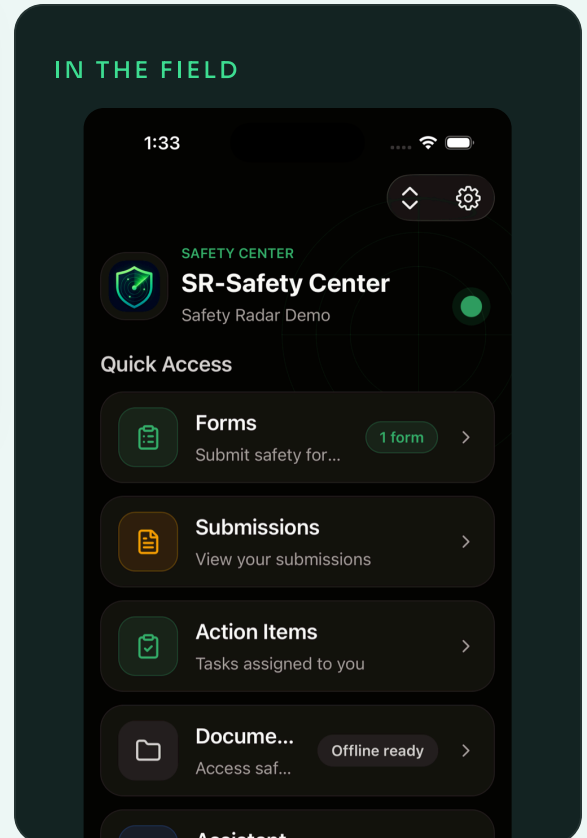

Every report immediately helps teams understand what happened, and what could happen next.

BOARD-READY PROOF

Insights Reports

Highlight causal trends, training gaps, and operational blind spots so you can adapt before the next incident.

IN THE FIELD

Smart safety. Proven results.

400%

A global energy company saw safety engagement grow by 400% within six months.

2 weeks

A logistics company deployed system-wide reporting in under two weeks, without changing legacy tools.

320K+

Fortune 500 companies and privately held enterprises have processed 320,000+ assessments on our platform.

WHAT PEOPLE IN THE FIELD ARE SAYING

“It took me 45 seconds to submit my first report. I’ve been wanting it to be this easy for 10 years.”

Welder, publicly traded manufacturing company

“Safety Radar is a paradigm shift. In the history of our company, we were never able to manage risk like this.”

CEO, mid-market energy equipment manufacturer

“This system doesn’t have bias. It helped us stop reacting to the wrong problems and focus on the real ones.”

EHS director, manufacturing company
